# PROJECT

Polymorphism Records was born in 2019 following the desire to bring together diverse musical influences and sound cultures. As a record label based in London and Madrid, we aim to work with artists from all over the Earth, with no specific genres or artistic expressions when experimenting and creating music.

Through this project we actively seek to contribute towards social and environmental causes. In alignment with our philosophy, we choose materials and means of production that respect the environment as much as possible, and donate our digital sales to non-profit organisations.

# RELEASES

## Vinyls & Digital

The first series released by Polymorphism Records are 4 EPs under a shared artwork concept.

Sound – Ep, four to eight tracks. Tracks include: original tracks by one artist and remixes/reworks by other artists, as diverse as possible to encourage intercultural exchange and representation.

Artwork – The image used as background for the cover design is chosen by the producer of the original tracks of the release. The rest of the composition is inspired by the sound of each original track, represented by abstract shapes within the artwork.

#### Plain 1

Now that we don't look at the time even if we have a watch that hurrys our days  
I wonder if the dew drops of this dense mist will have drunk us.  
But the subconscious reach to break in to make us to feel alive.  
More alive than ever, nothing will be able to stop us and doing so it's because...

#### Plain 2

Deserving that we made to make it from ourselves.  
Making oneself from it, stays itself to not to be with you and without me.  
Influenced by a system far superior so he doesn't search anything else.  
It speaks as much as it is unaware of...

#### Plain 3

Explaining to itself that everything is still to be done.  
Says to itself that nothing is more decent than letting oneself to fall down and uprising after to do  
Enveloped in anamorphic it online to the idea of a world ruled by children.  
Amazed by how wonderful life can be...

#### Plain 4

Understood as a doctrine path that is covered by the unexplained.  
Breathing the oxygen in the correct and dictated down by the Lord who is no other than oneself.  
But the oxygen is ether and the ignorance works as a funnel in the brain.  
Knowledge sets one free, they said...

# OTHER PRODUCTS AND PROJECTS

## Merchandise

---

We are currently working on designing and making other products that we believe would support our message and intention of using materials and ways of production that are less harmful towards the environment.

Polymorphism Records is committed to produce as locally and sensibly as possible. A garment that usually lives long in your wardrobe, a 100% organic cotton T-shirt printed with water-based ink will be available soon.

## OTHER PRODUCTS AND PROJECTS

# Showcases

Polymorphism Records first showcase event took place at Prisma in Seville. Amazed by their sound system and sound quality, we felt we should bring artists from our very first reference, Alcarcia, Hector Mad and Neri J. The team of more than 30 members running Prisma support the project in a non-hierarchical and democratic mindset.

The layout of the venue and atmosphere reflecting the team's ideology made it a great place for Dr. Gonzo and Elias the Prophet from Melting Pot Records who completed the line-up to make it a memorable night with a crowd totally dedicated to listening and dancing!
