#### Releases

PM002 - Antechamber - Archaic Idol (2020)

# PROYECT

## Philosophy and objectives

Founded in 2019, Polymorphism is an electronic music record label that seeks to work with artists from all over the world in order to bring together different cultures and musical influences.

In addition to the limited vinyl release, all titles are available to download or listen online - for free. Our physical product will be made as sustainable as possible being respectful of the environment. Profits from each release are put back into social causes, specifically, organizations dedicated to clean oceans and reforestation.

# RELEASES

## Physical recording, artwork, packaging and merchandise

Every release is recorded as an Ep and is made up of a total of between four and eight tracks, divided between original content and remixes.

The artists involved in each release have different nationalities, in line with our principle of cross-cultural respect. For the first one, Spanish artist Alcarcia has produced the four original tracks and the four remixes belong to Hector Mad (Spain), Solarmental (Georgia), Neri J (Denmark) and JLTZ (Italy).

The first series will consist of four releases that follow the same graphic line in terms of artwork. The first one has been recorded on a 12" vinyl, with original tracks in red and remixes in black. The packaging is made of sustainable materials in an effort to reduce the environmental impact of the production and distribution processes, where possible. The cover art has been divided into different parts, as many as tracks are on the release.

## RELEASES

Each of these parts consists of an abstract shape, inspired by the sound in each original track. They're all linked to each other and have a low opacity background image. The images will be chosen by the producer of the original tracks.

For the first series and for each release there will be between 100 and 300 copies published, with 90% of them available for sale. The remaining 10% will be reserved for those who have collaborated directly in the releases.

Finally, we would also like to point out that every piece of clothing distributed by Polymorphism is made from 100% organic cotton and screen printed with water-based ink (non-toxic).

The first release can already be listened to via:
